

CINDY WAWERU

Policy Researcher • Data Analyst • AI Ethics & Digital Governance Specialist

cindy.w.waweru@gmail.com • +370 631 12309 • Vilnius, Lithuania • Nationality: Kenyan
[linkedin.com/in/cindywaweru](https://www.linkedin.com/in/cindywaweru) • <https://cwaweru.github.io/>

PROFESSIONAL SUMMARY

Results-driven policy researcher and data analyst with 5+ years of experience delivering evidence-based policy insights for EU institutions, African development organisations, and government bodies. Certified in AI Fairness & Ethics (Turing College, EQF Level 7) with hands-on expertise in algorithmic accountability, bias detection, and responsible AI governance frameworks. Track record of four institutional publications for the European Parliament, EESC, and UNI Europa. Proficient in SQL, Python, R, Power BI, and advanced statistical modelling. Equally effective translating complex quantitative findings into actionable policy outputs for non-technical audiences and designing governance frameworks from the ground up. Committed to building inclusive, context-sensitive AI systems that serve African and global communities.

CORE COMPETENCIES

AI & Digital Governance	AI ethics frameworks • Algorithmic accountability • Bias detection & mitigation • Digital sovereignty • Platform economy regulation • Data rights & privacy
Policy & Governance	Governance framework design • Regulatory gap analysis • Policy brief writing • Accountability mechanisms • KPI & indicator design • M&E
Research Methods	Mixed methods • Econometric modelling • Key informant interviews • Survey design • Focus groups • Literature review • Scenario analysis
Data & Analytics	SQL (BigQuery, CTEs, window functions) • Python (Pandas, NumPy) • R • Power BI • Tableau • Advanced Excel • Time Series (ARIMA) • A/B Testing
Forecasting & Modelling	Time series analysis • Scenario modelling • MAPE & variance analysis • Revenue & cost modelling • Econometric forecasting • Capacity planning
Collaboration	EU institutional stakeholders • Cross-cultural teams • Non-technical communication • Executive reporting • Stakeholder management
Languages	English C2 • Swahili (Native) • German B1

PUBLICATIONS & RESEARCH CONTRIBUTIONS

AI Ethics & Algorithmic Accountability

[You Found Bias in Your AI System. Now What? A Practical Intervention Playbook](#) | Medium | May 2026

A practitioner-focused guide to diagnosing AI bias and implementing targeted interventions across the ML pipeline, from data preprocessing to post-deployment monitoring.

[I Built a Fairness Audit Playbook for AI Systems. Here's What I Learned](#) | Medium | May 2026

A step-by-step fairness audit methodology covering demographic parity, equalised odds, and counterfactual testing, with lessons from applying it to real-world automated decision systems.

Institutional Research (European Parliament · EESC · UNI Europa)

Socially Just Transition in the Green Deal: Cost of Inaction | *European Economic and Social Committee (EESC)* | *Jun 2025 – Jan 2026*

Scenario analysis and econometric modelling of social and employment impacts of green and digital transitions across 7 EU Member States.

Overview Report on Collective Bargaining Challenges in Service Sectors | *UNI Europa* | *Jun – Oct 2025*

Assessment of collective bargaining practices across EU service sectors; targeted recommendations for policymakers and trade unions.

PROFESSIONAL EXPERIENCE

Junior Researcher, Quantitative & Policy Analysis | [Visionary Analytics](#) · Vilnius, Lithuania | *Jan 2025 – Present*

- Contribute to evidence-based policy research for EU institutions on digital technology regulation, platform economy governance, green transition, AI, and occupational health — topics directly shaping continental data governance debates.
- Design analytical and governance frameworks with rigorous indicator definitions, ensuring cross-country comparability across 7+ EU Member States.
- Develop econometric and time-series forecast models for 12–18 month demand, resource, and employment projections (ARIMA, scenario modelling, MAPE analysis).
- Produce structured policy briefs, accountability reports, and BI dashboards for the European Parliament, EESC, and European Commission (DG CNECT).
- Conduct key informant interviews, stakeholder consultations, and focus groups with EU social partners, policymakers, and institutional representatives.
- Draft methodological sections for EU-funded research tender proposals; collaborate with economists, legal experts, and sector specialists.

Research Assistant, Quantitative | [Visionary Analytics](#) · Vilnius, Lithuania | *Jan 2024 – Dec 2024*

- Conducted quantitative analysis of EU labour market, digitalisation, and platform economy datasets for applied policy research.
- Compiled and cleaned cross-country indicators for comparative analysis; contributed desk research, literature reviews, and evidence mapping across multiple EU-funded studies.
- Developed analytical tables, charts, and draft visualisations used in study reports reviewed by senior EU institutions.

Research Assistant, Digital Finance & African Development | [FSD Africa](#) · Nairobi, Kenya | *Jan 2024 – Jul 2024*

- Conducted applied research on digital innovation, technology regulation, and sustainable economic development in African contexts.
- Supported monitoring and evaluation of development programmes: data collection, evidence synthesis, and progress reporting.
- Contributed to strategy documents and project proposals, gaining direct exposure to African digital governance and development finance challenges.

Graduate Trainee, Financial Analysis | [Citibank](#) · Nairobi, Kenya | *Jul – Aug 2023*

- Developed data analytics solutions for detecting suspicious financial activity; collaborated with Compliance and KYC teams on governance and regulatory reporting.
- Analysed regional banking performance data across 4 Sub-Saharan African markets; built executive analytics dashboard for C-suite decision-making in partnership with the SSA PR Head.

Project & Policy Coordinator, Data & Planning | [Ministry of Health](#) · Nairobi, Kenya | Feb 2022 – Oct 2022

- Designed accountability and KPI frameworks for a national UHC initiative across 12 pilot counties, embedding governance and reporting standards into programme implementation.
- Coordinated reporting with international partners (WHO, UNICEF), ensuring governance compliance and indicator consistency across 7 counties.
- Produced analytical briefs and dashboards for senior Ministry officials to track performance and regional disparities; managed workforce data for 1,200+ community health volunteers.

Data Specialist | [Ministry of Interior & Coordination](#) · Nairobi, Kenya | May 2020 – Dec 2020

- Managed data integrity of the National Registry of Birth Records, Kenya's primary national civil documentation system.
- Produced official statistical reports and demographic forecasts used in national healthcare and educational planning.
- Developed accountability dashboards tracking real-time registration completeness and service delivery backlogs at district level.

SELECTED ANALYTICS & RESEARCH PROJECTS

[Just Transition Directive Cost Modelling](#) Python · Econometric Modelling

- Forecasted EU-wide transition outcomes to 2045 using partial-equilibrium projections and scenario modelling (BAU, weak JTD, strong JTD); visualised employment, poverty, and regional disparity impacts across 7 Member States.

[Customer Lifetime Value Forecasting](#) SQL · BigQuery

- Built SQL framework using CTEs and window functions to calculate CLV, AOV, purchase frequency, and campaign ROI; delivered recommendations on budget allocation across customer segments.

[Student Retention Optimisation via A/B Testing](#) R

- Designed and analysed a full A/B experiment evaluating product change impact on enrolment, retention, and net conversion; delivered launch/no-launch recommendation using hypothesis testing and power analysis.

[HR Workforce Analytics Dashboard](#) Power BI

- Analysed workforce data for 290 employees covering headcount, sick leave, pay distribution, and demographics; identified hiring trends and imbalances to support executive workforce planning.

EDUCATION & CERTIFICATIONS

AI Fairness & Ethics Certification | [Turing College](#) | 2024

- Bias detection in AI/ML systems, ethical frameworks for algorithmic accountability, fairness metrics (demographic parity, equalised odds), and responsible AI design.
- Applied ethics concepts to real-world datasets, evaluating governance and accountability implications of automated decision systems.

Postgraduate Diploma in Data Analytics (EQF Level 7) | [Turing College](#) | 2023 – 2024

- Advanced statistical modelling, machine learning, forecasting, data visualisation, and database management.
- Completed 20+ real-world applied analytics projects reviewed by senior industry practitioners.

Bachelor of Economics & Statistics (Honours, GPA 3.7 / 4.0) | [University of Nairobi](#) | 2019 – 2023

- Econometrics, mathematical economics, probability, and economic analysis.
- Thesis: The Impact of Growing Public Debt on Economic Growth in Kenya.

Additional Certifications: Risk Management Corporate Finance Institute (CFI, 2023),
Goethe Zertifikat B1 (2024)
